SUMMARY — B.Tech. Graduate in Computer Science and Engineering (2026) with strong skills in Python and Machine Learning, and hands-on experience in projects like sentiment analysis and classification-based applications. Proficient in model building and problem-solving, with a solid understanding of core computer science fundamentals. Looking to contribute and grow as a Machine Learning Engineer.

TECHNICAL SKILLS

Languages: Python, C/C++, HTML5, CSS3, SQL

Developer Tools: VS Code, PyCharm, Jupyter Notebook, Miniconda, Google Colab, Streamlit

Technologies/Frameworks: Scikit-Learn, Matplotlib, NumPy, Pandas, TensorFlow, OpenCV, MediaPipe, LangChain

AI Tools: Gamma AI, Blackbox, ChatGPT, Gemini, Copilot, Claude, Deepseek

Operating Systems: Windows, Unix/Linux environments, shell scripting

Software Engineering Concepts: Software Development Life Cycle (SDLC), Software Design, Software Testing (Unit, module and regression testing), Agile development methodologies, System design and analysis, Database design

Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Operating System

EXPERIENCE

Machine Learning Intern | CSIR-CBRI, Ministry of Science & Technology (Govt. of India) 📍 Roorkee | **Jan 2026 – May 2026**

- Working as a Machine Learning Intern on a research-oriented project focused on LULC (Land Use Land Cover) Classification for smart urbanization and urban sustainability.
- Developing the project under the guidance of Dr. Kishor S. Kulkarni (Scientist 'E').

Machine Learning Intern | Suvidha Foundation (Suvidha Mahila Mandal)

📍 Remote | **Dec 2024 – Mar 2025**

- Collaborated with a team to fine-tune the Pegasus (transformer architecture based model) for improved abstractive text summarization.
- Optimized the training pipeline, achieving higher ROUGE scores (ROUGE-1: 0.42 to 0.46, ROUGE-2: 0.21 to 0.26, ROUGE-L: 0.38 to 0.44).
- Utilized PyTorch, Hugging Face Transformers, and Python for model training and evaluation.

PROJECTS

Deep Scholar - Multi-Agent Research System

[Github]

- Developed a multi-agent AI research platform using LangChain and Groq's Llama model to automate information retrieval, analysis, and report generation.
- Implemented autonomous Search, Reader, Writer, and Critic agents with tool-calling capabilities using Tavily Search API and BeautifulSoup-based web scraping.
- Built and deployed an interactive Streamlit application with PDF export functionality, enabling generation of comprehensive research reports with automated quality assessment.

Twitter Sentimental Analysis

[Kaggle]

- Developed a Twitter Sentiment Analysis project using Python, where tweets were cleaned, preprocessed, and transformed into features for model training.
- Trained and evaluated machine learning models on Kaggle's Twitter dataset to classify tweets into positive, negative, neutral, and irrelevant categories, achieving 88% accuracy using Random Forest.

EDUCATION

Central University of Haryana, Mahendragarh, Haryana

B.Tech. in Computer Science and Engineering

Nov 2022 - Jun 2026

CGPA - 8.5

Ben-Hur Public School, Pilibhit, Uttar Pradesh

• *Intermediate (Class 12th)*

2020–2021; Percentage - **95.6%**

• *High School (Class 10th)*

2018–2019; Percentage - **93%**

ACHIEVEMENTS & CERTIFICATIONS

- Complete A.I. & Machine Learning, Data Science Bootcamp
- 5-star rating in Problem Solving and Python on HackerRank as well as solved 150+ problems on Leetcode
- Secured 3rd Prize in Idea & Innovation Competition, Science Day 2024 at CUH
- Secured 3rd Place in "QuizDitch" organized by Coding Ninjas CUH Chapter
- Core Team Member, Tech. Fest "Advik", CUH (Feb 2023) – showcased leadership and coordination skills
