

SUMMARY

B.Tech. CSE student (2026 batch) with strong skills in Python and Machine Learning, and hands-on experience in projects like sentiment analysis and classification-based applications. Proficient in model building and problem-solving, with a solid understanding of core computer science fundamentals. Looking to contribute and grow as a Machine Learning Engineer.

EDUCATION

Degree	Institution	CGPA/Percentage	Year
B.Tech. CSE	Central University of Haryana	8.3 (Till 7th Sem.)	2022-2026(Expected June 2026)
Class 12th (PCM)	Ben-Hur Public School	95.6%	2020-2021
Class 10th	Ben-Hur Public School	93%	2018-2019

EXPERIENCE

- CSIR–CBRI, Ministry of Science & Technology (Govt. of India)

Machine Learning Intern

Jan 2026 - Present

Roorkee

– Working on a research-oriented project focused on LULC (Land Use Land Cover) Classification under the guidance of Dr. Kishor S. Kulkarni (Scientist ‘E’).
- Suvidha Foundation (Suvidha Mahila Mandal)

Machine Learning Intern

Dec 2024 - Mar 2025

Remote

– Collaborated with a team to fine-tune the Pegasus model (transformer-based) for improved abstractive text summarization.

– Optimized the training pipeline, achieving higher ROUGE scores (ROUGE-1: 0.42 to 0.46, ROUGE-2: 0.21 to 0.26, ROUGE-L: 0.38 to 0.44).

– Utilized PyTorch, Hugging Face Transformers, and Python for model training and evaluation.

PROJECTS

- ATS Career Optimizer

Github

– Built an ATS tool to match resumes with job descriptions and generate improvement suggestions.

– Provided personalized skill-based recommendations to enhance employability.

– Developed in Python using Gemini-1.5 Flash API with a Streamlit interface.
- Twitter Sentiment Analysis

Kaggle

– Developed a Twitter Sentiment Analysis project using Python, where tweets were cleaned, preprocessed, and transformed into features for model training.

– Trained and evaluated machine learning models on Kaggle’s Twitter dataset to classify tweets into positive, negative, neutral, and irrelevant categories, achieving 88% accuracy using Random Forest.

TECHNICAL SKILLS

- Programming & Core CS Fundamentals: Python, C/C++, SQL, HTML5/CSS3, Data Structures & Algorithms (DSA), OOP, Operating Systems, DBMS & Database Design, SDLC (Agile).
- AI, Data Science & Frameworks: TensorFlow, Scikit-Learn, NumPy, Pandas, Matplotlib, OpenCV, MediaPipe, LangChain, Streamlit, Large Language Models (LLMs/Prompt Engineering).
- Tools & Developer Ecosystem: VS Code, Jupyter Notebook, Google Colab, PyCharm

CERTIFICATION & ACHIEVEMENTS

- Complete A.I. & Machine Learning, Data Science Bootcamp
- 5-star rating in Problem Solving and Python on HackerRank as well as solved 150+ problems on Leetcode
- Secured 3rd Prize in Idea & Innovation Competition, Science Day 2024 at CUH
- Secured 3rd Place in “QuizDitch” organized by Coding Ninjas CUH Chapter
- Core Team Member, Tech. Fest “Advik”, CUH (Feb 2023) – showcased leadership and coordination skills
